Day 5	Interview Skills , Virtual Interviews, Confidence Building	Virtual mock interviews were conducted using live whatsapp call for each student	Students get a first hand experience on how virtual interviews are conducted

Soft Skills vs Hard Skills: What are they?

- Hard Skills refer to the knowledge and ability that an individual needs in order to do their job. Hard Skills can range from knowing how to code in C language to being well-versed in how to argue in a courtroom. In the social sector, more specifically, hard skills may mean the ability to conduct research in the field, fundraise, design and implement projects, create curricula, or even undertake marketing for an NGO and their cause.
- Soft Skills, on the other hand, are the interpersonal skills that people need in order to do well in their jobs. This can mean having the ability to work well in teams, manage time, and multitask. While soft skills are a necessity if one wants to do well in any field, they are especially important for Social Work.
- Much of the work that is done in the social sector involves multiple stakeholders, all of whom might have different interests. In scenarios such as these, it is imperative to have the right kind of interpersonal skills in order to reach a positive resolution.
- Here are some of the soft skills that are necessary for Development Management and Leadership Professionals:

Part 2- Python Programming Training Sessions – Python Programming Contents :

Sr. No	Module heading	Module	Duration
7	Getting Started with PYTHON	Introduction of Python	8
		Features of Python	
		Input and Output Functions (with Format functions)	
		Keywords ,Variables, Identifiers ,Constants	
		Installing Python and Code Editor	
		Getting Familiar with Command Line	
		Writing and Running Your First Python Program	
8	Operators and Data Types	Arithmetic Comparisons, Bitwise,Logical,Assignment, Special Operators	8
		Data Types in Python	
		Numbers	
		Strings	
		List	
		Tupels	
		Set	
		Dictionary	
		Type Conversion	
		Implicit Type Conversion	
		Explicit Type Conversion	
9	Conditions and Loops	If-Else Statement	8
		For Loop	
		While Loop	
		Break and Continue	
		Practice Programming	
10	Functions	Function with Parameters	8

- The 15 Days Training was conducted in two parts. Part-1 includes Softskill Training and second part is actual Hands on Training on Python Programming. Overall 60 students from MCA Department have successfully completed GTT Training on Python Programming.

About Part-1 Soft Skill Session

- The soft Skill session was conducted by Hiral Desai Madam. She has devoted total 5 days for Soft Skills Training .
- The major technical hands on Training on “Python Programming “ was conducted by Miss. Asmita Gorse.
- With the soft skills training the students know everything about Soft Skills like Interview skills, Email writing skills, Resume Writing, Group Discussion etc.
- Soft Skills, on the other hand, are the interpersonal skills that people need in order to do well in their jobs. This can mean having the ability to work well in teams, manage time, and multitask. While soft skills are a necessity if one wants to do well in any field, they are especially important for Social Work.

About Part-2 Python Programming

- In first few days of session, students build a foundation in programming using Python.
- They learn to work with variables, data types, lists, loops, conditional logic, and functions, all while building a passion for programming through our engaging project-based lessons.
- The fundamental programming skills they learn in this course are transferrable between programming languages and problem domains. After completing this course, students are ready to tackle the next step in our structured curriculum, *Beyond Basics with Python*.
- Build basic programs using fundamental programming constructs like variables, conditional logic, looping, and functions
- Work with user input to create fun and interactive programs

Few Glimpses of Soft Skills & Python Programming Training Sessions:
