What was your intended outcome behind organizing this event? (both qualitative & quantitative)	To give a glance of competitive programming platforms and let them able to manage pressure of being under that environment. To analyze the level of members to be able to solve problems and further work on their skills.
What was the actual outcome? (both qualitative & quantitative)	To be able to handle pressure and maintain calm under such circumstances. To get to know the Competitive Programming problems and environment. To let them known the level of difficulty of problem statement.
Highlights of the event	Real-life scenario based problem, problem based on basics of CP, on-time technical issues resolving.
Challenges faced (if any)
