B.E. Video making Competition

DEPARTMENT OF INFORMATION TECHNOLOGY
 Jayawantrao Sawant College of Engineering, Hadapsar, Pune-411028

- 1. Problem Statement**
 To identify the vulnerabilities of the server for the purpose of improving the security posture.
- 2. Objective**
 - All Internet systems and applications carry security risks. Complexity of systems are increasing day by day leading to excessive vulnerabilities within the system.
 - It is therefore better to identify the vulnerabilities of the system before the hackers do.
 - Vulnerability Assessment and Penetration Testing helps in identifying these vulnerabilities and specifying the level of risk.
- 3. System Architecture**
- 4. Applications**
 1. Identify the weakest link in the chain.
 2. It will help you in understanding loopholes or errors that can lead to major cyber attacks.
 3. VAPT gives a more detailed view of the threats that your network or applications is facing.
 4. It helps enterprises to protect their data and systems from malicious attacks.
