**Innovation By Faculty Member In Teaching And Learning**

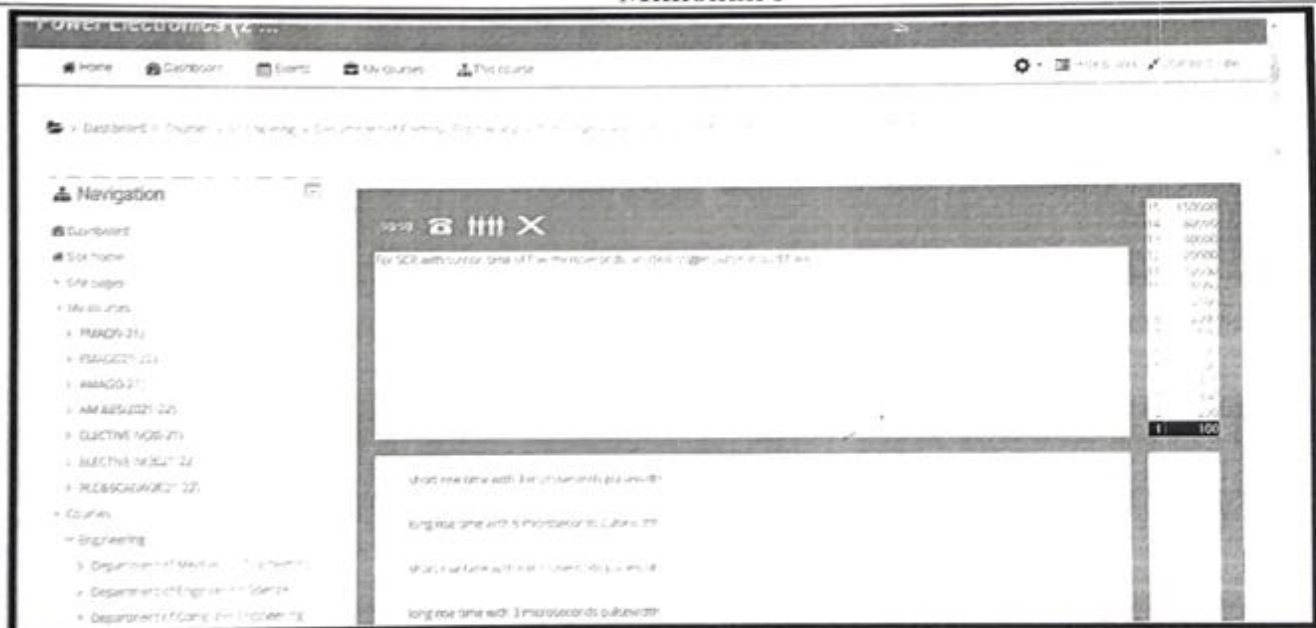

**Name of Method : Game Pedagogy ( IN LMS (moodle))**

**Description :** Game-based learning is a teaching method that allows learners to explore different parts of games as a form of learning. It can be successfully used to improve both learning and teaching. Students won't be able to gain any information and skills out of dull learning process but they understand the application of skills and knowledge to solve real-life problems with help of effective learning process. Learning through games allows students to experiment in non-threatening scenarios and acquire knowledge through practice and social interaction both with the environment and their peers.
